Axiora

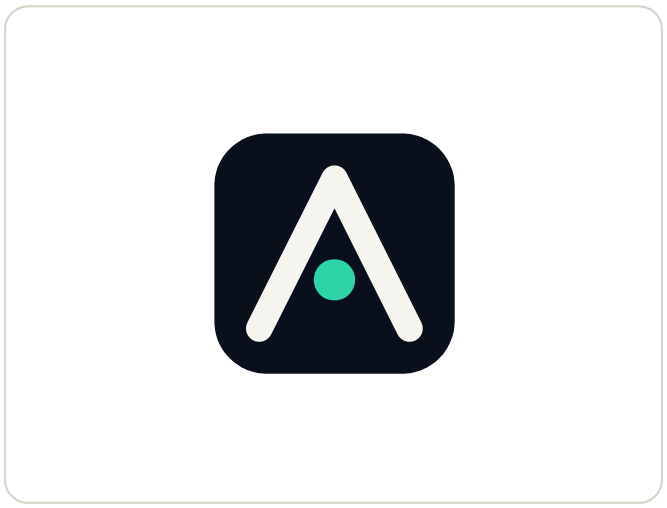

Intelligence, engineered. An AI-first studio for automation, machine learning and full-stack software. The mark is an open A with a single node where the crossbar would be: structure, plus a point of decision.

Primary logo

Mark and avatar

USE FOR

- Favicon, app icon, social avatars (LinkedIn, Instagram, Facebook, GitHub)
- Minimum size 16 px; clear space equals twice the node diameter
- Wordmark minimum width 96 px

Rules

DO

- Use Ink on Paper, or Paper on Ink
- Keep the node in the accent

DON’T

- Stretch, rotate or add shadows and gradients

colour on primary versions
- Convert the wordmark to outlines before print or final export

- Recolour outside the palette
- Place on busy photos without a solid backing

Next steps

The SVG files (mark, light logo, dark logo) are delivered alongside this page. Before committing to the name, check the .com / .ai / .io domains, social handles and trademark search in your country.
